

## Satellite Equipment Rentals Module

The Satellite Equipment Rentals Module is fully integrated within the SATbill system: Key benefits of the Rentals module include:

-  **Single-click rental invoicing**
-  **Easy reconciliation of rental returns**
-  **Barcode-based check-out/check-in**
-  **Easy configuration of complex tariffs**

### Core elements of the Equipment Rentals Module

-  Each rental item may be given a specific rental and a specific air-time tariff
-  Equipment can be reserved and converted to a Rental at the appropriate time
-  Provides Packing List, Despatch Note and Courier Instruction documents
-  Generates a 'Check-In' sheet for testing and verifying returned equipment
-  Enables the configuration of a complex 'kit of parts'
-  Handles both unique and generic items
-  A rental may contain multiple items, which may have different start and end dates
-  'Express Rental' option to enable rapid rental despatches when demand is high
-  Handles both air-time-consuming items and non-air-time-consuming items
-  Handles delivery and other one-off rental charges
-  Automatic opening of the air-time contract at the date & time of check-out
-  Automatic closing of the air-time contract at the date & time of check-in
-  All calls are the customer's responsibility from the check-out to the check-in
-  SIMs may be moved between handsets and all air-time charges correctly tracked
-  Items lost on rental may be marked as such and charged accordingly
-  Contains all the features of the SATbill Air-Time Billing system
-  Separate Rental and Air-Time invoices (late CDRs will be billed when they arrive)
-  Invoicing in the customers currency
-  PDF-, Word- and paper-based invoices
-  Interfaces available to various financial and accounting systems
